

A2X leaves no room for error, giving ecommerce sellers confidence in the accuracy of their financials, knowing their numbers add up each month. A2X posts all sales and fees into Xero in tidy summaries that reconcile to the payments in their bank account.

Key benefits of using A2X

- 1. Accurate books** - You can have confidence in your financials, knowing your numbers balance to the cash in your bank account.
- 2. Save time** - A2X automates the seller accounting process and takes care of the details. A2X saves hours of time and gives you one less thing to worry about.
- 3. Accounting your way** - A2X is customizable so you can choose from A2X standard settings, or organize your numbers down to the level of detail you need.

A2X integrations

A2X sits in between your ecommerce sales channel and Xero. A2X currently supports integrations with Amazon, Shopify, Walmart marketplace, eBay managed payments and Etsy. Save time, work smarter, and have confidence your ecommerce financials are accurate.

Simplify accounting with A2X and Xero

Accurate accounting - All your sales and fees are automatically sorted, then posted to Xero as a summarized statement, so they match the deposits in your bank account, down to the cent.

Saves you time - Tracking your financials in spreadsheets and importing sales into Xero one-by-one is a thing of the past. A2X automates the whole process and turns what took hours into a few seconds.

Safe and secure - All marketplace and store transactions are securely sent to Xero using bank-grade encryption technology, so you never have to worry about the safety of your business data.

How A2X and Xero work together

- 1. Link to Amazon, Walmart, eBay, Etsy Marketplace or Shopify Store** - Request access to the ecommerce platform or invite them to connect to A2X.
- 2. Link to Xero** - A2X connects the Shopify Store, Amazon, Walmart, eBay or Etsy Marketplace to Xero in minutes. The A2X team can help you or your client to get set up.
- 3. Load and summarize ecommerce transactions** - Amazon, Walmart, eBay, Etsy marketplace or Shopify store transactions are loaded to A2X and grouped to match the payouts to the bank account.
- 4. Reconcile your books with ease** - Bank deposits can be easily reconciled with the numbers A2X posts to Xero. You can be confident everything will match to the cent.

Features

- A2X supports Amazon, Shopify, Walmart, eBay and Etsy allowing you to connect all of these platforms to your Xero ledger.
- A2X generates invoices from each settlement and posts them to Xero, either manually or automatically.
- You can select the accounts and tax rates that apply to each type of income or expense either in A2X or Xero. When the payment appears in your bank account within Xero, you can easily reconcile the invoices to their corresponding payments.
- A2X can connect more than one A2X account to one single Xero organisation.
- A2X will split the settlement data according to which month the sales or fee actually occurred in ensuring that financial accounts properly record the transactions in the month that they've occurred in.

Why A2X?

- 1. A2X is trusted by the best ecommerce accountants around the world**, to ensure accurate accounting for their clients.
- 2. A dedicated support team**, so you'll receive local help from the experts.
- 3. Created by software engineers**, with a decade's experience in ecommerce.
- 4. Hundreds of independent five-star reviews from customers** across Xero App Marketplace, Shopify App Store, Capterra, G2, and more.
- 5. A2X is the recognized industry leader** in ecommerce accounting automation. It is relied on by thousands of ecommerce sellers.
