

A2X gives eBay marketplace sellers confidence in their financials, knowing their numbers add up. A2X posts all eBay sales and fees directly into Xero, QuickBooks or Sage in tidy summaries that match the eBay Managed Payments to the bank account.

Customer pain points that A2X solves

It's not easy to accurately account for eBay sales and fees. Sellers can be dealing with:

- Different currencies and taxes.
- Accounting for different fee types.
- Settlements that span month-end.
- Inaccurate margin calculations due to Cost of Goods Sold (COGS) timing differences.
- Sometimes high transaction volumes that can swamp Xero, QuickBooks or Sage.

This can make reconciling eBay sales and fees a nightmare. A2X automates this process and makes accounting for eBay a breeze.

How A2X works

1. Connect A2X to your eBay seller hub and to Xero, QuickBooks or Sage in minutes.
2. A2X loads your eBay transactions then maps them against your chart of accounts, and allocates them to the correct financial periods.
3. A2X then posts tidy, summarized journals into Xero, QuickBooks or Sage that match the batched net cash received from eBay.

Additional Features

- Reconciles eBay Managed Payments perfectly
- Automatically imports accurate eBay Managed Payments data and allows this to be posted to your accounting system in tidy summaries.
- Scales to support thousands of daily orders without sending thousands of individual invoices to the accounting system.
- A2X supports all eBay sites worldwide
- A2X also supports Amazon, Shopify, Etsy and Walmart, you can connect all of your marketplaces to a single accounting system for multi-channel sellers.
